

## § 909.5

the general counsel shall request the Department of Justice to represent the officer or employee.

### § 909.5 Conditions for authorizing testimony.

(a) Any non-Federal party desiring testimony from a NOAA officer or employee shall make a written request therefor addressed to the Office of General Counsel. The request shall include a general statement of the testimony to be elicited, the requester's interest in that testimony, a brief description of the intended use of the testimony and a statement as to why the testimony is not available elsewhere.

(b) The general counsel or designee shall authorize a NOAA officer or employee to provide factual testimony when the requesting party has sufficiently shown: (1) That the evidence to be adduced is not reasonably available from any other source; (2) that no NOAA record or data could be introduced in evidence in substitution for the testimony; and (3) that the other requirements of this part have been met.

(c) Where less than all of the conditions of paragraph (b) of this section are met, the general counsel or designee may authorize NOAA employees and officers to provide factual or expert testimony on any matters where NOAA has a significant interest in the litigation and the outcome may affect the implementation present or future policies, or where circumstances or conditions make it necessary to provide the information in the public interest.

(d) If the general counsel or designee authorizes the testimony of a NOAA officer or employee, then the Office of General Counsel may arrange for the taking of the testimony by methods that are less disruptive of the official activities of the officer or employee than providing testimony in court. Testimony may, for example, be provided by affidavits, answers to interrogatories, written depositions, or depositions transcribed, recorded, or preserved by any other method allowable by law. Costs of providing testimony, including transcripts, will be borne by the party requesting the testimony.

SOURCE: 63 FR 24922, May 6, 1998, unless otherwise noted.

#### § 911.1 Purpose.

These regulations set forth the procedural, informational and technical requirements for use of the NOAA Data Collection Systems (DCS). In addition, they establish the criteria NOAA will employ when making determinations as to whether to authorize the use of its space-based DCS. The regulations are intended to facilitate the collection of environmental data as well as other such data which the Government is interested in collecting. In those instances where space-based commercial systems do not meet users' requirements, the intent is to not disadvantage the development of the commercial space-based services in this sector. Obtaining a system use agreement to operate data collection platforms pursuant to these regulations does not affect related licensing requirements of other Federal agencies such as the Federal Communications Commission.

#### § 911.2 Scope.

(a) These regulations apply to any person subject to the jurisdiction or control of the United States who operates or proposes to operate data collection platforms to be used with the NOAA DCS either directly or through an affiliate or subsidiary. For the purposes of these regulations a person is
